

READING THE CUBE LINEAGE

A six-dial design language for cube-engine shooters - where each game sits, not which bucket it lands in.

● AssaultCube

● AssaultCube: Reloaded

● Cube 2: Sauerbraten

● Red Eclipse

Reading trick: AssaultCube and ACR overlap on five dials and split only on BUILD MASS (dashed). That gap is what Reloaded is.

Shorthand: vanilla AssaultCube = purist barracks | ACR = barracks maximalism | Sauerbraten = fever-dream sculpt | Red Eclipse = airborne neon

Interpretive reads of each game's default play, not measured values. A cube-lineage reading instrument.
